

GutPro™ custom probiotic supplement

All probiotics recognize that a healthy, balanced digestive system is crucial to a healthy life. And that's all good. Unfortunately most people are not aware that additives in some probiotics can actually prevent the very health they are designed to support. That's why we created GutPro™ probiotic supplement.

Custom probiotic formula

Our custom probiotic formula is designed to provide essential elements for digestive health, **without certain bacteria strains** and additives that can irritate some people. This makes GutPro™ the right choice for people with sensitive digestive systems... or for anyone who wants to improve their digestive health, in a way that is kind to the gut.

Based on years of feedback

GutPro's™ unique custom probiotic formula is based on extensive research gathered from communities with a vested interest in improving gut health.

- GAPS Diet (Gut and Psychology Syndrome)
- Body Ecology Diet
- Gluten Free / Casein Free / Soy Free (GFCFSF)
- Autism / PDD-NOS
- PANDAS, PANS (*Pediatric Autoimmune Neuropsychiatric Disorders Associated with Streptococcal infections*)

NOTE: WHILE GUTPRO™ WAS DESIGNED BASED ON FEEDBACK FROM THE ABOVE COMMUNITIES, WE DO NOT IMPLY THAT IT IS DESIGNED TO TREAT ANY SPECIFIC MEDICAL CONDITION, NOR DO WE IMPLY THAT IT IS "COMPLIANT" WITH A SPECIFIC DIET.

Everything you want in a probiotic

- As many friendly probiotic bacteria strains as possible
- Therapeutic potency
- **Guaranteed potency** (strains are freeze dried and kept refrigerated)
- Available in powder or capsules (easy to titrate your dose, start low and build up)
- Made in the USA 

Unlike other probiotics, GutPro™ is free of unwanted additives

- No allergens (e.g. dairy, corn, soy, gluten. GutPro™ probiotic is produced on a non-dairy, non-soy vegetarian culture)
- No fillers or excipients (e.g. inulin, cellulose, maltodextrin, FOS)
- No strains that are reported to cause reactions (e.g. streptococcus thermophilus, etc)
- No strains that contribute to **d-lactic acidosis** (e.g. l-acidophilus, etc)
- No unnecessary ingredients (e.g. magnesium stearate, silica, titanium dioxide)

Clinically documented effectiveness

- All probiotics used in our formulations have been thoroughly researched and documented
- **Human-compatible species** of Lactobacillus and Bifidobacterium
- Colonizing and transient species with documented benefit
- Avoidance of spore-forming species

The perfect balance of L-lactate and D-lactate

Some people think that probiotics that contain any D-lactate producing strains can cause acidosis. This is too simplistic of an explanation. [Click here to find out more about d-lactate free probiotics.](#) Together, the eight strains in GutPro™ custom probiotic, along with a proper diet, may be an effective way to correct gut dysbiosis and reverse acidosis.

Exclusive GutPro™ 8 strain formula

- Lactobacillus plantarum
- Lactobacillus gasseri
- Lactobacillus salivarius
- Bifidobacterium bifidum
- Bifidobacterium infantis
- Bifidobacterium longum
- Bifidobacterium breve
- Bifidobacterium lactis
